(502) 526-5282 ♦ kevinhood@live.com

## Summary:

While working as a self-taught ASE certified master automotive technician I was introduced to programming by a close friend. For a couple of years now I've turned wrenches during the day, and read everything I possibly could at night in regards to programming. Taking the knowledge I learned, I have built a small portfolio of websites and mobile apps.

While building my portfolio I've learned that programming is definitely my calling and I'm excited to have found this new passion in life.

## Skills:

### Languages:

- C#
- PHP
